Full job description

Your new company

This established multidisciplinary consultancy located on the fringe of the CBD and have been steadily growing in recent years which has seen a recent move to their new offices. Having secured numerous projects which will keep them busy well into next year and with a busy portfolio of existing clients regularly awarding repeat business they are looking for ambitious experienced engineers who want to further develop and grow their own careers. They have an excellent reputation in the industry among both competitors and clients and are arguably the most innovative consultancy within the Civil & Hydraulic space

Your new role

Due to this positive outlook they have made a strategic decision to employ a Civil Design Engineer specialising in the design of drainage and stormwater treatment systems. You will have a proven background and experience of working on projects of this type and carrying out the design of systems incorporating pipes, pumps, valves, pits and treatment systems as well as all other civil elements

What you'll need to succeed

- Skilled in the use of AutoCAD & Civil 3D and have hands on design
