Full job description

The Cashless Debit Card (CDC) Evidence, Evaluation and Data Monitoring Section sits within the Cashless Welfare Engagement and Support Services Branch. Using a range of data sources to monitor and evaluate the CDC program, the Section also supports other CDC business areas with their data requirements, informing policy and program development.

Additionally, the Section manages engagement with relevant states and the Northern Territory to develop data sharing arrangements for the delivery of the CDC and program evaluation.

The key duties of the position include

The APS6 Data analyst contributes to complex reporting using research and data analysis skills to provide data insights and analytical evidence to allow effective reporting decision-making.

The Analyst will help design and perform a variety of quality assurance tasks to ensure programme health is accurately assessed, reported and improved if required.

Key Duties may include:

- be part of a highly technical data team
- willingness and ability to undertake SQL Programming training
- undertake analysis and research to support evidence-based decision making
- utilise well-developed judgement and problem solving skills
- demonstrate strong analytical and evaluation skills
- demonstrate high level communication.

Desirable Skills:

- understanding of qualitative and quantitative analysis
- ability to research and gather information from a variety of sources and explore different viewpoints and options
- high level communication and interpersonal skills including the ability to engage with stakeholders effectively

- ability to cope with ambiguity and change
- collaborate with other staff in immediate work area
- understanding of welfare policies
- project management skills.
