### Full job description

This is a fantastic opportunity to adjust your career by getting on board with an industry leader. The business is considered to be one of the leading mid tier contractors, who are winning projects as the principal contractor on water treatment facilities and general civil work.

A government initiative to upgrade Brisbane's water supplies has been finalised. This company has been awarded an ongoing contract to deliver water treatment and piping works in and around the plants as the head contractor.

While liaising with in house engineers and client representatives, you will supervise labourers and site staff, ensuring that the daily production rates are met and that construction matches the initial design and client's specifications.

This role will suit an experienced Civil Foreman who has experience delivering concrete packages on water treatment facilities while dealing with the following:

**Experience managing water / concrete / projects**

**Ability to read & interpret engineering drawings**

**Awareness of QA & OH & S issues on site**

**Experience managing project costs / diary**

This is an exciting opportunity to progress your career with a reputable company where you will learn by working with experienced professionals as well as a tailored career development plan.

To apply online, please click on the link below. Alternatively, for further information, please contact Justin Paul on +617 3250 9504 quoting Reference No. JNP220202.
