storage environments;

- Facilitating continuous improvement of data protection and storage systems;
- Providing Subject Matter Expert responses addressing Incident and Problem management;
- Regularly liaising with project stakeholders and ICT stakeholders as necessary.
- Ad-hoc reports and document future BAU procedures, which may include:
 - High Level designs and detailed level designs;
 - Standard Operating Procedures;
 - Change requests;
 - Statement of requirements; and
 - Status reports and briefing material.

Skills and Experience:

- 2+ years' demonstrated experience in operating data protection solutions (primarily EMC data protection suite, but small pockets of Netbackup and Comvault).
- 2+ years demonstrated experience in operating at least one of the Storage solution (primarily DELL/EMC).
- Demonstrated ability in applying technical knowledge to ensure solutions are implemented effectively and with a strong emphasis on quality and compliance.
- Experience in facilitating the continuous improvement of data protection and storage systems.
- Sound understanding of Windows and Unix operating systems.
- Relevant IT qualifications or vendor certification in the following would be an advantage:
 - SRM Reporting tool Administration;
 - HP Storage Management;
 - EMC Storage Management;
 - Hitachi Storage Management;
 - Avamar Data Protection Management;
 - Networker Data Protection Management.

Australian Citizens with an NV1 Clearance are highly desirable for this role.
