Full job description

This is one of the best Machine Vision Engineer roles on the market. Our client's purpose is to integrate Machine/Computer Vision software and hardware solutions to provide accurate and timely information to their client's equipment. We are looking for a strong programmer, in C, C++, C#, Python etc.. , as a lot of thier products are bespoke and need customization.

Your day will never get boring, as there is a range of Integration projects with Machine Vision along with robot programming and automation projects.

Education / Skills and experience

- Bachelor Degree in Electrical Engineering or Mechatronics or/ Electrician Trade Certificate plus Electrical Engineering Certificate
- Machine Vision and PC programming skills - C, C#, C++, and Python
- Previous experience using HALCON highly regarded
- Working knowledge of sensing technologies, image processing, and their application to projects. These include advanced sensing technologies such as X-Ray, CT, and hyperspectral imaging
- Must have strong mechanical comprehension skills
- An excellent level of written and verbal communication
- Must have strong integration skills and experience integrating Machine Vision solutions
- Must hold current Australian Drivers Licence

Only Candidates with working rights in Australia need APPLY
