Full job description

Join a high calibre agile digital project

The Scrum Master is responsible for ensuring the work within the squad's backlog is managed, groomed and delivered with the teams in accordance with their sprint and program increment goals.

The company:

Our client, a leading financial services organisation is looking an experienced Scrum Master to assist with a digital customer portal project.

Experience:

- Prior experience as a Scrum Master in a digital space ideally with Customer portals
- Experience facilitating all scrum events within the team, including Sprint Planning, Daily Scrum, Sprint Review, and Sprint Retrospective
- Experience with Scaled Agile Frameworks (SAFe)
- End to End facilitation
- AEM (adobe experience manager) exposure highly desirable
- API and Oracle backend ideal
- Financial services industry experience highly regarded
