Full job description

Water Planning Engineer Brisbane/en-US/aurecon/job/Brisbane/Water-Planning-Engineer_R17242/apply Just imagine your future with us At Aurecon we see the future through a very different lens. Do you? Innovation, eminence and digital are at the heart of everything we do. Are you excited about the future? Are you driven by the opportunity to work on some of the most challenging and complex projects around the world and to learn from the best? We are. Diversity is at the core of everything we do. We work together to create a culture based on respect, trust and inclusiveness. Our differences are what fuel our creativity. We embrace flexible working and are always open to discussing your individual needs so that you get to create your own experience with us. What will you do? We are seeking an experienced and motivated Professional Water Planner to join our expanding Transport, Land and Water Business in South East Queensland. You will play an integral part in a high-performing team of skilled water specialists that bring ideas to life for our clients across many types of water-related projects. As a Professional Water Planner, you will support local and regional delivery of water planning projects for a diverse range of internal and external clients, including within the public and private sector. The role incorporates a technical focus on water, wastewater and recycled water networks and systems planning, optioneering and hydraulic modelling for our key clients. In joining our market-leading team, you will contribute to the delivery of our growing portfolio of networks and system planning projects across Queensland and the broader ANZ region. We know the work we do is vital in assisting our worlds economic development and, its

the technical expertise and the depth of knowledge of our people that really sets us apart. Here are the key things you will do to bring ideas to life. * Deliver valued water, wastewater and recycled water networks and system planning solutions in response to key drivers (such as growth servicing, asset renewals, asset reliability, system resilience, sustainability, liveability etc.) and in consideration of optimum whole-of-lifecycle costs and associated risks and benefits. * Deliver high-quality and timely technical outputs that meet our clients expectations and foster long-term client relationships. * Engage with clients and contribute to client meetings and workshops, with a strong focus on collaborative working and integrated teams in partnership. * Confident and proactive in project delivery contributing to technical excellence as part of a high performing, engaged and supportive team. * Contribute to business development including identifying opportunities and in support of pursuits and preparing proposals. * Actively participate in delivering the Aurecon Blueprint and our Water Strategy. * Support junior members of the water team in the development of their networks and system planning skills. The ideal candidate for this position will possess; * Qualifications such as Chartered Professional Engineer status and Registered Professional Engineer of Queensland status. * Demonstrated experience in identifying water, wastewater and/or recycled water network planning needs and assessing system performance (utilising hydraulic modelling tools), as well as developing and evaluating options to arrive at a preferred solution * Competency in the required planning tools: MS office suite, hydraulic modelling software (i.e. Innovyze, DHI and/or Bentley products etc.) and GIS software (i.e. ESRI, Mapinfo products etc.) * Demonstrated initiative and diligence in working to resolve problems and promote new ideas * A strong sense of commitment, a willingness to learn and a desire to work in a dynamic, diverse and high-performing team environment * A passion for achieving excellence in the water industry and as a team player * Excellent oral and written communication skills

We know today's complex challenges can only be solved through bringing together diverse teams of people from across our business, so there will be opportunities for you to apply your skills and creativity to projects in other geographies and markets. What can you bring to the team? Firstly, you will share our genuine passion for re-imagining engineering and be someone that actively pursues continuous learning to help shape the future. You will also need a relevant technical qualification and chartered status would be preferable. Our Aurecon Attributes describe the types of people we bring together for clients. We don't expect you to have all eight of the attributes, but one that is unique to you. Finally, we value that each of our team members brings something different to Aurecon. We look for people who have had a broad range of experiences throughout their career and can demonstrate how they have worked as part of a team to bring ideas to life. Does that sound like you?

About us We've re-imagined engineering. Aurecon is an engineering and infrastructure advisory company, but not as you know it! For a start, our clients ideas drive what we do. Drawing on our deep pool of expertise, we co-create innovative solutions with our clients to some of the world's most complex challenges. And through a range of unique creative processes and skills, we work to re-imagine, shape and design a better future. We listen deeply and intently, which helps us see opportunities,

possibilities and potential that others cant. Think engineering. Think again.
