PROJECT ENGINEER

### Full job description

#### Your new company

Our client is an industry leader with over 30 years' experience in supply and assembly of high-quality projects within the process control & industrial automation equipment. They play an integral part in servicing major industries and due to continuous growth, have a Project Engineer job for an experienced and organised industry professional.

#### Your new role

Reporting to the Project Manager, you will be involved in technical review and compliance, ensuring drawings, specifications and standards are adhered to. You will attend project meetings and ensure activities are executed in accordance to set specifications. Your industry relevant expertise will see you assist the Project Manager and ensure OHS standards and processes are followed.

#### What you'll need to succeed

To be considered for the job you will, preferably:

- Have a qualification in Electrical Engineering;
- Have previous experience in project engineering and design;
- Have exposure to the oil and gas industry;
- Have sound knowledge of Australian Electrical Standards, fabrication,
