Full job description

Your new company

A leading Australian defence company that specialises in the development and supply of acoustic systems for submarines, ships, navy.

Your new role

As a DevOps Engineer work closely with different internal stakeholders and ensure system configuration and integration components are developed to align with defined IT security guidelines.

What you'll need to succeed

- 5+ year's proven experience working within a DevOps engineering capacity.
- Proficiency in creating scripts for automation of recurring tasks (using at least one of the following: JavaScript, Python).
- Proven administration and integration experience with Atlassian Jira and Confluence Server platforms
- Experience with source management/version control tools, including Git.
- Experience with CI/CD and related automation tools, e.g. Jenkins and Docker.
- Strong development experience in integrating multiple systems and tools using various APIs including RESTful.
- Working knowledge of database and networking technologies
- Must be an Australian Citizen to apply for this role.

What you'll get in return

- Opportunity to learn new technologies in naval applications and systems.
- Fun culture. A social and collaborative working environment.
- Flexible working hours.
- Exposure to a range of products and systems to ensure you remain challenged
