Full job description

Cornerstone HR are looking for multiple High Pressure Water Blasters for various onshore scopes of work commencing May & June 2021.

To be considered you will require the following:

- Proven experience operating high pressure water jetting equipment
- Experience cleaning and maintaining jetting equipment
- Proven experience working on projects and shutdowns within the Oil & Gas &/or Mining industry
- These roles are very labour intensive therefore a high level of physical fitness is required.

Required Qualifications and Tickets:

- HPWJ Operator Licence (Assistant minimum)
- Ability to pass pre-employment medical and Drug & Alcohol Screen
- Current Working at Heights (WAH) obtained within the last 2 years.
- Current Confined Space (CSE) obtained within the last 2 years.
- Current Drivers licence
- White or Blue Construction Card
- Breathing Apparatus (BA), desirable
- Gas Test Atmosphere (GTA), desirable

You must be able to demonstrate experience working within a remote site, ability to obtain a clean police clearance (if required) and pass a drug and alcohol screen.

Cornerstone HR WA is developing a growing presence in the Mining & Oil & Gas space with clients beginning to increase workloads through multiple project contracts. With this comes increased demand from our clients for high quality talent.

If you are interested in speaking with the team, please apply directly or send your resume to mining@cornerstonehr.com.au and one of our team will be in

contact.
