Full job description

About Our Client

Our client is an ASX Listed business and they have a need for Hands on Infrastructure Team Lead to join their team and help contribute to their success. This is a newly created position, and you will report directly to the CIO.

Job Description

The Infrastructure Team Lead will be responsible for:

- Manage all network hardware and software globally to ensure all items are covered by Hardware/Software maintenance contracts by respective vendors.
- Manage annual spend on capital expenditure to ensure the company is in line with current IT technologies that benefit the organisation and its user base.
- Telecommunications & Data Networks at all locations.
- All network peripherals including Network Switches, Firewalls, Routers, Computers/Servers/Laptops/ Mobile Devices, and other IT Hardware such as multi-function devices (scanners/fax/printers).
- Supervise overseas offices in the installation of new equipment. This will be done via VPN, remote access connections for office and roaming sales personnel.
- Install, configure, and maintain PCs and servers, networking equipment and network operating systems (Windows Server 2012 - 19) - this will include installing cabling as required, rebuilding of virtual servers when required.
- Setup and Maintain VM Servers when required.

- Provides data networking facilities to enable all employees global access to various IT systems via VPN, WAN or LAN connections.
- Manage user access and supervise changes made by administrators.
- Daily system back-ups, setting up user accounts, monitoring file access, file and VM restores etc.
- Manage endpoint security, Microsoft patches (desktops, laptops, and servers).
- Manage VEEAM backup and recovery including DRP.

The Successful Applicant

The Infrastructure Team Lead will ideally possess the following:

- Strong relationship management skills.
- Previous people management experience.
- Excellent Problem-solving skills in a complex Global IT environment.
- VMWare Vsphere experience with server, Vmotion and Fault Tolerance.
- Excellent knowledge of Cisco Meraki, MFA, Routing configurations and VLANS.
- Sophos Endpoint Security, Mail Gateway Security.
- Microsoft Server, Windows 10, Firewalls, Configuration and Security of internal LANS.

What's on Offer

On offer is a permanent position with an ASX listed business. You will have exposure to the latest and greatest of technology and the organisation invest in their people.
