Full job description

Your new company

Located in Adelaide's Northern Suburbs, this Defence Industry organisation is currently ramping up their Engineering team and recruiting a number of Structural Engineers to support them in their design portfolio.

Your new role

You will work with a team of multidisciplinary engineers, and on a day to day basis be involved in; structural and vibrational analysis; fatigue management; welded and pressure resistant structure design, analysis of metallic structures for structures for static, dynamic, fatigue and fracture conditions, using both classical hand techniques and FEA.

What you'll need to succeed

You will need to have had post graduate levels of Engineering experience, current memberships or eligibility for memberships with the Institution of Engineers Australia (CPEng or Fellow will be highly regarded). Your experience within a submarine, defence marine or heavy engineering environment will be preferred. As this role is in the Defence industry, you will need to be an Australian Citizen.

What you'll get in return

You will have excellent job security, and fantastic above market working benefits by working with this well-established employer. You will have flexible working arrangements, career development support and numerous opportunities to continue to allow your career progression.

What you need to do now

If this role sounds just like you, then please, apply now. Alternatively, if you would like to know more then please contact Ioana Oliphant on 7221 4159.
