AUSTRALIAN CITIZEN / PERMANENT RESIDENT

In return you will have the opportunity to work with a Large Australian Consulting Provider, playing a key role delivering project management across critical keynote projects.

Responsibilities:

- Reviewing with Service Management, Vendors, internal IT Support Groups and Business Support Groups of the new product support needs.
- Working with client and palling the cloud adoption strategy.
- Documenting each service components, establishing ownership and negotiating required level of support.
- Consulting and providing support to stakeholder management and project team, focusing on service functionality, service implementation and handover into operational environment.
- Ensuring that appropriate level of product education and technical training is undertaken prior to new product deployment and service take-up.
- Creating and implementing a comprehensive communications plan.
- Management of internal and external escalations to ensure successful outcome.

Requirements:

- Minimum 7-10 years managing large scale IT Application projects within enterprise environments.
- Proven successful delivery from initiation to deployment/closure of large-scale IT projects.
- Maintain a large client focus and uphold stakeholder engagement. Demonstrate confidence to interact at all levels both internally and externally to the business (including technical and non-technical levels)
- Manage technical (and non-technical) resources and deliver a complex program consisting of Cloud, DevOps & Azure, security and related projects to schedule, budget and within scope.
- Demonstrated experience delivering solutions with COTS and bespoke applications, including integration with cloud and on-premises infrastructure.
- Specific project environment experience - Azure Foundations, Cloud Optimizations, DevOps, Deployments, 365, Infrastructure, Migrations, Implementations, Product Build, Transformations or Security.
- Ability to see the 'big picture' and then work collaboratively with each area and system to ensure success - Azure experience advantageous.
- Understand how to mature agile deliverables and adapt through the adoption of appropriate hybrid and waterfall methodologies as per individual

environments.

- Demonstrated experience coordinating and tasking multiple teams of IT project resources.
- Demonstrated experience in guiding business stakeholders through large process change.
- Experience in developing, managing and delivering to detailed schedule.
