### Full job description

Technical Operations Specialist Perth/en-US/Qantas\_Careers/job/Perth/Technical-Operations-Specialist\_R72714-1/apply \* Exciting role with the opportunity to make an impact on continuing airworthiness requirements for our fleet of aircraft \* Permanent full time role \* Shift work \* Located at Perth Airport Our smaller businesses are an important part of the Qantas Group so no matter where you fit in we come together with pride to deliver the best and safest experience for our customers. Safety is our first priority. Our organisation wide commitment means every individual takes responsibility for creating a safe and healthy workplace for our customers, suppliers, assets, operations and the wider community. We see it as our responsibility to take ownership and drive outcomes, taking the organisation forward. We understand our priorities and what needs to be delivered, taking the initiative to keep things moving. We bring teams and individuals together to deliver on our customers expectations. The Technical Operations Specialist will provide technical support to Maintenance Watch and the AMO in returning out-of-service aircraft back into revenue service, managing the recovery as a single point of coordination where it extends beyond day of operations. You will also drive increased long term fleet reliability and on-time performance by ensuring proper diagnosis of defects and appropriate rectification. The role is also a qualified Maintenance Watch Engineer, as such your secondary role will be acting in this role as required. Youll have: \* Hold a CASA Aircraft Maintenance Engineers Licence rated on F100 and or A320 or similar aircraft in the B1/B2 category, or a similar tertiary qualification \* Strategic and analytical thinker with

proven problem-solving and time management skills, particularly when under pressure \* High level of computer skills in Microsoft Office and familiarity in IAS/Trax software packages \* Ability to communicate effectively with all levels within a team. \* Demonstrated commitment to safety, quality, and process compliance \* Experience with the management of AOG Recovery of aircraft. \* Ability to work as part of a team to produce safe, compliant and desirable outcomes on behalf of the business. \* Flexibility to work a 4 on / 4 off (day shift) roster, including weekends \* Five years experience working as an aircraft engineer or technical support role

We want to see our people grow personally and professionally. Our brand values and Qantas Group beliefs guide the way we behave, reminding us to always live up to those expectations. Together, we can achieve more than we ever imagined. Be a part of something special and play your part in the Qantas story get in touch today. Please note this role is based in Perth and you must be willing to live and work from this location. If you are travelling from interstate or overseas, all travel cost will be at your own expense and considerations will need to be taken regarding current Government restrictions for self-isolation upon arrival to Western Australia.

Posted 2 Days Ago Full time R72714 Life in the Qantas Group is fast moving, challenging and always exciting. nbsp; That's because today we're much more than an iconic airline. With 35,000 people in Australia and overseas across our airline, freight, catering, ground service, loyalty, health and media arms, we're as diverse as the people who work with us. Together we're driving our success and maintaining our position as a world class organisation. And as we engage our next generation, we continue to look for the passion, ambition and commitment that have always set us apart. nbsp; Wherever you work across the Qantas Group, you'll quickly discover that a role with us is much more than a job. In this dynamic environment, you're encouraged to demonstrate initiative, embrace a challenge and build your experience every day.
