### Full job description

Your new company

Our award-winning consultancy has been around for over 20 years. We are a talented team of energetic and enthusiastic industry professionals with many years of experience. Our people are what make us deliver exceptional results. Our professional staff gain ownership in the process, are proud of what they do and continually build a mastery of the specific skills required to deliver quality service to our clients. We are proud to have worked in collaboration with clients on multiple projects over time. It is an endorsement of our skills and the quality of our relationships that makes clients trust us with their next opportunities. Technical competency and knowledge are at the core of what we provide; however, building quality relationships is also a measure of our success. We invest in our client relationships both personally and professionally.

Your new role

- Perform engineering design work efficiently
- Produce design in accordance with company procedures and instructions and agreed timelines and design
- Requirements in Occupational Health and Safety Act and Regulations of Victoria

- Identify and raise any issues that will affect outcomes, resolve issues and seek approvals effectively
- Undertake design checking as required by the Engineering Manager
- AutoCAD design and drafting
- Maintain project files according to the Document Control Procedure and Engineering Design Procedure
- Be capable of retrieving information upon request
- Control all documentation by way of document transmittal
- Identify any areas of risk in achieving program objectives
- Assist in the preparation of program, cost estimates and risk reviews
- Prepare and monitor project programs, and or review project programs prepared
- Prepare briefing papers on specific issues (i.e. cost analysis, building rates etc.)
- Liaise with authorities as necessary
- Maintain a working knowledge of relevant engineering legislation, building codes and policies as they apply to projects, and ensure that all engineering work adheres to regulation and requirements
- Review design systems and processes and implement continuous improvement processes where appropriate
- Comply with the Occupational Health and Safety (OHS) Act and Regulations, Compliance Codes and Codes of Practice of Victoria and relevant Australian Standards

#### What you'll need to succeed

- Bachelor of Engineering (Civil)
- AutoCAD design and drafting skills, ability to mentor
- junior staff
- 12D modelling
- Excellent interpersonal and communication skills (written and verbal)
- High level of personal organisational skills
- Professional image – high standard of personal presentation, ethics, attitude and credibility
- Pro-active approach
- Land subdivision design experience and expertise
- Design from first principals
- Practical knowledge of engineering techniques

#### What you'll get in return

You'll join a supportive and collaborative team of about 50 people with a fare split between male and female. You'll get an opportunity to develop your career internally, we are loyal to our people and vice versa. You'll enjoy our flexible work arrangements. You will work on diverse projects and be part of an organisation where positivism and fun make our work culture very enjoyable.
