Full job description

Long term contract roles

Opportunity to work in a challenging Program and grow your career in a solid team

Rewarding and interesting program

About the Company

My client is a household name organization, a respected company with cutting edge and with a broad internal and vendor IT landscape. This is the opportunity to work with some of the smartest IT professionals in Australia and add a fantastic logo to your career path.

About the role

My client is looking for an Mid to experienced Java Engineers / Developers for a 6-month initial role (extensions on offer) for a role in Melbourne for a major financial end client.

Identity Access Management (IAM) integration experience is essential -

Although this will be an office-based role there will be some flexibility to work from home.

Role

- Any commercial IAM Application Intergration / Development experience
- Experience with Java, Groovy, JavaScript, web programming skills including REST/JSON/SOAP and SQL, JUNIT Test Cases
- Any experience with federation models using SAML2.0, OAuth2 and OpenID Connect.
- Experience with LDAP Directory Servers
- CI/CD tools (Github, Bamboo, Codescan-checkmarx, Confluence, Jira, Harness)
- Agile development experience.

Highly Desirable

- Preference to have Google Cloud Platform (GCP) Experience.

How to apply

If you feel that you are good fit for the role please apply straight away, and if you feel you are a great fit please apply and give Richard a call on 0477 415 639
