### Full job description

#### Our Client

Is a leading global tech company and is reshaping the future of delivery. This subsidiary of our client is focused on on-demand drone delivery service. They have also developed their own unmanned traffic management system to safely route drones through the sky.

#### About the Role

Our client is looking for small unmanned aircraft system (sUAS) Ground Support Operators (GSO) to join their flight operations based in Logan, Queensland. Ideal candidate will help deploy our aircraft on daily basis as well as operate as the principle client loader of the aircraft. The GSO is expected to conduct a pre-flight of the aircraft and be responsive to customer support requirements for package loading, while maintaining a serviceable fleet of aircraft. The successful candidate will operate closely with other flight operations team members and maintenance personnel. The GSO will assist to manage a highly autonomous aircraft system and be responsible for the safe conduct of multi-aircraft missions from multiple sites.

#### Main Responsibilities

- Site set up
- Pre-flight checklist compliance
- Identify aircrafts that require maintenance action
- Package consignment preparation
- Aircraft loading
- Assist any emergency response plan
- Work on weekends
- Operate as part of a team conducting shifts
- Operate client's sUAS as a loader
- Conduct ground support duties
- Engage with customer support team for package consignment and loading to meet the expected delivery times

- Operate alone or in a team of 2 people

### **The Successful Candidate**

- 1 year of relevant experience, freshers with eagerness to learn will also be considered
- Strong written and oral communications
- Valid Driver's license
- Ability to work individually and in teams while maintaining rigorous attention to detail required in an operations environment
- Ability to physically lift 35lbs
- Perform continuous tasks in outdoor environment
- Willingness to travel to support ground and flight testing for periods of time
