Full job description

Manvision Consulting provides IT Contracting and Professional Services to the Australian Market since 2008. Join a talented team and work in a culture that stimulates an inclusive and flexible work environment, offering opportunities to grow and contribute to the company.

Roles and Responsibilities

- Analytical ability, creativity and judgment in developing and implementing software solutions to complex requirements.
- To be able to complete development activities in a timely and cost-effective manner.
- Working with counterparts and be able to explain technical issues to them.
- Thorough understanding of and effectively executes existing software development processes and procedures and develops new approaches and improvements as appropriate.
- Ability to update and develop accurate and thorough documentation.
- Flexibility to assume additional responsibilities as needed.
- Must be an Australian citizen
- Must hold at least an AGSVA Baseline security clearance, NV1 preferred
- Extensive knowledge across multiple platforms, processes or architectures, particularly related to Service Oriented Architecture, Micro Services and CLIENT Integration Technologies such as IIB, MQ, Data Power and API Connect
- Linux - Expertise and experience in Linux/RHEL system administration and shell scripting
- Java - Expertise and experience developing in J2EE frameworks such as spring and JPA/Hibernate; and working with web services (SOAP) and DB2 databases
- Inclination and desire to perform detailed, hands-on technical activities to high-quality standards
- Preparedness to learn and develop new technical skills quickly
- Self-driven and detail-orientated
- Able to work collaboratively and productively within a team structure
- Integration - Expertise and experience developing in CLIENT Integration Middleware technologies such as Data Power, Integration Bus, MQ and API Connect as a Developer
- Experience with the development and execution of test cases using the Rational Test Suite
- Experience developing and implementing operating system level scripting to support automation of operation, management and software deployment activities
- Experience developing RHEL software deployment packages (i.e. RPMs)
- Experience with the development and maintenance of SELinux environments.
- Experience operating and managing ICT infrastructure in the Defence environment (or similar)
- Experience working with Defence or similar federal government secure network gateways
- Eligible to obtain a higher AGSVA security clearance, eg NV1 or NV2, if

required.
