Full job description

Work on marquee transport infrastructure projects for a major privately owned multi-disciplinary consultancy. Influence growth and business strategy

The Company

With a rich history of providing multi-disciplinary engineering design services across Australia and internationally, this engineering design consultancy have an outstanding reputation across multiple sectors.

They are employee owned; meaning that business decisions are made based on what's right for the company and employees and not the profits of shareholders. As a result, they offer excellent working conditions and benefits as well as an opportunity for all members of staff to influence business strategy and performance.

This, coupled with a highly skilled and knowledgeable leadership team, an approachable open door policy to the directors and leading training and development scheme make them a highly regarded employer.

The Role

They have recently won a marquee project which has added to an already strong pipeline of projects and tenders. This, combined with a structured investment in strengthening and growing their transport infrastructure group,

AUSTRALIAN CITIZEN / PERMANENT RESIDENT

has resulted in the need for highly skilled and talented engineers. A critical hire is that of a Principal Drainage Engineer.

The Responsibilities

As the Principal Drainage Engineer, you will be responsible for the delivery of major projects, mentoring and guiding the drainage team, allocating resources and tendering for work. This will include marquee transport infrastructure projects as well as major and minor roads.

The Requirements

To be considered for this career defining role, you will be able to demonstrate:

- That you are already operating at a Principal level or are ready to take the step up
- Extensive experience of delivering drainage designs on major RMS road and highway projects
- The ability to manage and mentor staff and to allocate resources effectively
- The drive and passion to assist in the overall growth of the transport infrastructure group and to be a key member of the business
- Full working rights in Australia

This is an outstanding opportunity to work on major transport infrastructure projects for a consultancy that don't have the red tape of publicly listed companies. You can drive and shape change and delivery and will be able to challenge the status quo.
