STRONG COMMUNICATION SKILLS

Full job description

Your new company

A global iconic Engineering Consultancy with offices across the world, is currently recruiting multiple Systems Engineers to support one of their Defence clients.

Your new role

You will be responsible for supporting the design assurance of system level design artefacts including integration of the Mission Systems and Support systems and maintaining Systems Engineering practices and procedures and their compliance with department, regulatory and legislated requirements. Your day to day duties will involve; support the systems engineering program, input to the technical design and solutions into the systems IPT to ensure design and solutions meet the systems level technical support requirements and delivery support to integration.

What you'll need to succeed

You will need to have Australian Citizenship, a degree in Engineering or equivalent qualifications and minimum 5 years experience in a similar Engineering role, preferably a defence project environment. You will have superior knowledge and experience in Systems Engineering and expert understanding of engineering methods, design and development. You will also have the ability to contribute and work in a cross- functional team and display strong communication skills, with the ability to effectively communicate with personnel at different levels and from various disciplines.

What you'll get in return
