Full job description

Your new company

NSW State government health department who are working closely with the Australian Government to plan and implement a safe and effective COVID-19 vaccination program in NSW.

Your new role

- Responsible for construct, unit testing, automation and support of data extracts, transformation, load processes, scheduling and developing documentation in line with the data management processes
- Accountable for carrying out complex data analysis using appropriate tools (for example, MS Excel, SAS Enterprise Guide and SQL)
- Responsible for data and quality management tasks for data stored within the data warehouse
- Provide timely and expert advice using health data
- Contribute to the implementation and maintenance of system, process and testing documentation, frameworks, and standards, and develop guides, training content and presentations as required
- Work collaboratively with the team to support reporting, dashboard development and analytics framework
- Cultivate close working relationship with key internal stakeholders to support collaboration on data mapping and extracts, data models, BI and projects relevant to the role to ensure objectives are met

What you'll need to succeed

- Tertiary qualification in a relevant discipline or equivalent operational experience

- Expertise in quantitative methodologies

Experience in SAS, R and Advanced Excel

- Comprehensive knowledge of one or more areas of epidemiology, statistics, population health, health information management and health performance management however broader analytical skills and experience will be considered

What you'll get in return

This is a contract role until December 2021, offering up to \$67 per hour + Super
