looking for the next step in their Building Services career and have an interest in developing detailed design solutions while being responsible for the delivery of a range of exciting fire protection engineering projects.

The person appointed will be responsible for the technical, on time and on budget delivery of these projects.

Key responsibilities:

- Provide fire protection engineering design for wet, dry and specialist fire systems.
- Carry out general engineering duties to ensure quality and systems/process requirements are achieved.
- Undertake site inspections and prepare reports for our major clients.
- Proactively identify opportunities for improvement.
- Be an active member of the Building engineering team and contribute to the team's success.
- Guide and mentor junior engineers, designers and graduates.

Minimum Requirements

- Demonstrable knowledge and experience in the fire protection engineering field within an Engineering Consultancy environment;
- Experience in preparing technical design documentation;
- Proficiency with industry standard software (such as; Hyena, MS Office, AutoCAD);
- Ability to achieve and maintain high levels of quality and consistency of outputs proactively and independently;
- Ability to work autonomously and take responsibility for quality of deliverables and meeting deadlines;
- Desire to work in a team of like-minded professionals;
- Exceptional levels of written and oral communication;
- RBP accredited, highly desirable.

Preferred Qualifications

- Bachelor's in engineering Discipline;
- CPEng or working towards CPEng, highly desirable;
- Prior experience/understanding of CAD/Revit, highly advantageous but not essential.
