

## Data Analyst (Mining Domain)

Hays Data & Advanced Analytics • Townsville QLD

Base pay

\$100,000 - \$120,000

Work type

Full Time

Contract type

Permanent

### Full job description

#### Your new company

A leading and global mining organisation in Mount Isa, QLD is seeking a Data Analyst (mining) to work on the next generation of mining projects!

#### Your new role

Your new role will see you work within the small but dedicated multi-disciplinary Operations Technology team comprised of IT engineers (software, network, electronic, hardware etc) and mining professionals to work on the improvement of processes and operations within the mining sector using the latest cutting-edge technology.

On this team you will act as the data subject matter expert which will see you build up this teams data engineering capabilities by analysing different technological solutions to see how these could be further enhanced by introducing advanced data analytics. As part of this you will be developing new data warehouses to be integrated with existing mining solutions (Modular Dispatch Underground, Sandvik Automine, Pi Historian, etc), working on the creation of new data pipelines, the automation of data procedures, conducting performance reviews to speed up data resources and conducting other relevant data mining, analytical and visualisation duties.

An example of the work this team has conducted would be the design, build and roll out of autonomous mining vehicles to improve the safety, performance and efficiency of mineral transportation within a mine site (which is continually being improved using data engineering).

#### What you'll need to succeed

You will need experience/knowledge across some of the following:

- SQL and data mining
- Microsoft Stack (MS SQL Server 2016+, SSIS, SSAS, Azure, MS Power Platform)
- data visualisation languages and tools such as SSRS, Power BI Report Server/Service, DAX, Power Query, Python, etc
