Full job description

Software Team Lead Adaps (Melbourne VIC, Australia) Follow 2 days ago Job Ref: 12421 Print Job Share Job Tweet Software Team Lead * Software Team Lead * Hands on Development * Melbourne CBD Based Role * Longterm Fixed Term Permanent position * Good experience as a Team Lead with strong background of C#,Java Script,ASP.Net and SQL * Previous experience in Utilities domain (specifically metering and AMI) big bonus About the Role The Development Team Lead will oversee a 4-5-person team of Melbourne-based developers who are focused on building and maintaining the software foundation for all of the business operations. The systems are all built from the ground up using a mix of C#, JavaScript, ASP.NET, and SQL, and emphasise

quality, usability, performance and scalability. Reporting to the General Manager Software Development, the Development Team Lead will be responsible for working collaboratively with a diverse team of subject matter experts and business analysts doing day-to-day hands-on development, maintenance of key software systems and components, as well as contributing to the overall architecture and solution design of all software components developed. This is a challenging role as you maintain your own high software development standards and through your leadership encourage a high-performance culture within the team. You will build new software components efficiently and on time, while continuing to support a number of existing systems. You will be comfortable in delegating responsibility to other developers as required. To be suitable for this role candidate MUST * Have experience in team leadership and management organise, mentor and motivate the development team; * Delivery of high quality projects on time; * Work with the GM Software Development and other development teams to design and develop advanced software architectures that maximise our technology advantage; * Work collaboratively with senior developers, business analysts, testing, software support, and IT infrastructure teams to plan and execute projects; * Lead by example in code quality and technique; * Manage multiple software development projects ensuring that appropriate procedures, processes, tools and staffing levels are in place; * Monitor and evaluate completion of tasks and projects against the schedule for delivery of requirements; and * Analyse software requirements and create and implement design plans. Please apply using the link below, calling Nick on 03 8506 6551 quoting reference # with any questions. Based on the volume of applications, only shortlisted candidates will be contacted initially.
