Full job description

- Up to \$85k + Super
- Generous Bonus Structure (up to 40% of base)
- Well Established Global Company
- Stable Workforce
- Great Next Step in Your Career

Our client a well established global engineering and manufacturing company specialising in large capital equipment that produces clean energy is seeking an experienced engineer that is ready to take the next step in their career.

In this role you will join the dynamic senior sales team to assist with both pre and post sales. You will provide technical advice and prepare solutions that will assist in managing the design, quality, procurement, testing and delivery of the company's products, with your main responsibilities being Project Management / Delivery, Tender Support & Preparation along with Sales Support. Ultimately you will assist the Sales Engineers to project manage and deliver their projects. The projects range in value from \$200k - \$1m and are built on skids mostly.

To be successful in this role you will need to be a degree qualified engineer in either a mechanical or electrical discipline, your background doesn't need to be extensive however, you will need some experience working for an OEM and any proficiency in Project Engineering, managing piping etc would be a definite advantage. In addition to this you will need knowledge of AutoCAD 2D / 3D, be an excellent communicator, have strong customer service skills and the ability to fit in and get on well with others. You will also need to have strong problem solving skills, be an abstract thinker and the ability to prioritise workloads.

This company is an employer of choice, who recognise and reward their people. If you are keen to take that next step in your engineering career to a global employer \$100b + Company then don't hesitate to apply now via the tab below attaching your up to date resume. Any queries can be directed to Sheryn Leach on 0438 300 294
