### Full job description

#### About Our Client

My client is a world leader in qualitative research software and services. They're currently looking for a UX/UI Designer with a SaaS / Product background to join their head office here in Melbourne.

#### Job Description

Working closely with Software Engineers and Product Owners within agile project teams and customers you will be:

- Collaborating with stakeholders to understand and unearth business requirements
- Develop and share UX guidelines and work with developers to maintain good UI design
- providing wireframes, style sheets, brand control guidance, mock- ups, usability guidelines, and other artefacts
- Using fast, low fidelity prototyping to develop a runway for future implementation
- Assist with UX testing
- Attend and contribute to iteration planning, backlog meetings and providing incremental updates on UX, UI and design elements

#### The Successful Applicant

For your application to be successful, you will have:

- Previous experience in a SaaS / product based business
- Experience building both low fidelity and high fidelity prototypes
- Experience with development teams and understand how to ensure quality design alongside feasible solutions
- The ability to set up and manage a design system with a standardised set of components
- A track record of business processes, wireframing, and creating

interactions and workflows

### **What's on Offer**

For your hard work and commitment to the role, you will be rewarded with the opportunity to join a software company with global reach, be part of a team that's passionate about qualitative research and you'll get to own the UI/UX function.
